Nature *Ocean Giants*

Whales and dolphins, known as cetaceans, may seem to be totally alien to us—but with their mental ability, group communication and the recent discovery that dolphins have individual names, they are closer to us than we ever imagined.

With two of the world's top underwater cameramen—Doug Allan and Didier Noirot—filming breathtaking encounters, this new *Nature* program offers insights into the lives of whales and dolphins in three visually powerful, engaging and entertaining episodes (airing back-to-back this month).
